EJET
ELECTRIC YACHT TENDERS

UNLEASH YOUR THRILLS

Take your adventure to the next level with the ability to support your favourite water sports such as skiing, wakeboarding, and more. Experience the pure excitement of gliding through the water with zero emissions, leaving only a wake of memories behind. Join the movement towards sustainable boating with EJET electric yacht tenders and start creating memories that last a lifetime.

IT ALL STARTS WITH NATURE

EJET was made for exploring the untouched corners, offering everything traditional boating has but with an emphasis on preserving nature and creating unforgettable moments.

Our vision is to revolutionize the luxury yacht experience by providing a sustainable, efficient, and fun way to move around. With our state-of-the-art electric tenders, we aim to reduce the carbon footprint of the yachting industry while providing an unparalleled level of performance, comfort and style. Our focus on cutting-edge technology, exceptional design, and customer satisfaction, will position EJET as the leading provider of electric yacht tenders for discerning customers worldwide.

**ELEVATE YOUR YACHTING
EXPERIENCE WITH AN
EXCEPTIONAL TENDER**

Indulge yourself in the ultimate luxury experience for your yacht with our exceptional tenders, meticulously crafted to perfectly fit every yacht around 20 meters and above. Whether docked or stored in the yacht's garage, our tenders offer unparalleled convenience. With our state-of-the-art charging solutions, you can easily charge your EJET directly on board your yacht, ensuring you are never left with an empty battery. Designed with reliability in mind, our tenders require almost zero maintenance, ensuring you can enjoy your time on the water to the fullest. Trust us to deliver the perfect complement to your yacht, providing a seamless experience that will exceed your every expectation. With EJET tenders, the possibilities are endless. Let your imagination glide effortlessly.

WHY WE DO IT

We innovate to drive progress and create a better future, a future that is sustainable, hassle free and strikingly beautiful. We develop and use cutting-edge technology, engineering expertise and partner with the best experts in the marine industry to create unforgettable experiences for our customers. At EJET exceptional is the norm.

We started the idea of a high performance electric yacht tender in 2016. Our main question was: can we make an electric yacht tender which will be faster, stronger and better than what we could find on the market at the time. Our answer after years of R&D was a definite YES.

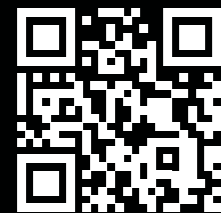

We built the company and the brand on three pillars: experience (driver-centric), sustainability (using clean electric power) and innovation (using cutting-edge technology and high-end components).

Made for yachtsmen by yachtsmen.

Build and reserve your tender today!
